

Barrel Racing

(Offered to AI and BI Athletes)

Three barrels are set in a triangle, using the following measurements:

Barrels 1 and 2 are set 27.43m (90') apart and 18.29m (60') from the start/finish line.

Barrel 3 is set in the center (as the top of a triangle) 32m (105') away from barrels 1 and 2. See layout diagram.

If the course is too large for the available space, the pattern should be reduced in increments of 4.57m (15') until it fits into the arena. Remember to leave adequate space between barrels and any obstacles. The distance from Barrel 3 to the finish line need not be reduced by these increments if there is sufficient room for the horse to stop.

When measuring the area for the barrel course, remember to leave ample room for horses to complete their turns.

Allow at least 13.77m (25') from the start/finish line to the end of the arena. Upright poles should mark the start/finish line. Brightly colored 55 gallon plastic or metal drums may be used.

The barrel pattern can be run starting either to the right (barrel 1) or left (barrel 2) See diagram for details.
