

Unified Relay

AI, BI, BS (trot) CI, CS, (walk)

- Teams in a division will be made up of 2 riders each.
- If it can be done safely, two teams may compete at the same time.
- The clock is started when the nose of the team's first mount crosses the starting line.
- The clock is stopped when the nose of the team's last mount crosses the finish line.
- Batons are prohibited. Riders go when the nose of the previous horse crosses the line.
- Horse handlers, if used, must walk behind the horse's nose. If the horse handler passes the horse's nose at any time, that rider must make a circle at a walk before continuing.
- Course length is dependent upon arena size. See diagram for course setup.
